

Moving to New RefWorks

Existing RefWorks users:

To begin the process, [connect to RefWorks](#). If you are off campus, login with your domain username and password.

A link will appear at the top of your existing RefWorks account and will look like this:

Click the link to 'move to the newest version of RefWorks' and follow the on-screen instructions to create your account.

All of the contents (references, folder structure, attachments and custom styles) within your account will be moved over to the New RefWorks automatically.

Notes:

* You can maintain both accounts in parallel.

** You can import records to New RefWorks multiple times but it is a one-way migration, meaning reference changes / new references will not migrate back to your original account.

** * If you have put references in New RefWorks and want to go back to your original account please contact your librarian.
