How to check that your links in a Library News blog post open in a new window.

When you add text to a library blog post, you usually are copying and pasting it from another source. When you do this, the information on where to open links does not always transfer across, so you need to go in to the post and check the linking options.

Find your post and click the edit blink at the foot of the summary screen.

Highlight your link.

Paragraph 🔻 B I 🗄 🗄 🕊 🗮 🖅 🖅 🖉 🗞 🖬 📟 💿
also important to have some understanding of what the tool can and cannot do.
The peer review filter can limit to peer reviewed journal titles. However, editorials, news items and book reviews that are published in peer reviewed journal titles don't go through the same editorial process as a research article. The peer review filter alone cannot eliminate these items from a database search although the number of such items may be quite limited.
It is also useful to know that the phrase peer review is an umbrella term that describes a growing number of ways in which academic literature is evaluated for quality. Traditional methods have focused around single, double and triple blind reviews which anonymise either the reviewer but not the author or both, or both in addition to the members of the editorial board. Some criticisms of these methods have arisen including lack of transparency, potential conservatism amongst publishers and potential for bias (including cultural and gender bias) not to mention the expense and time involved in what can be quite discover.gcu.ac.uk/o-explore/fulldisplay.
