Learning with ChatGPT

Dr Dawn Carmichael

Getting started

- Register - https://openai.com/api/

- Two step authentication with phone

- Login - https://chat.openai.com/chat

- What is ChatGPT…

- A large language generation model trained by OpenAI. It uses deep learning to generate human-like text based on the input provided to it.

ChatCPT can….

- Code completion
- Code Syntax assistance
- Code debugging
- Explanation of concepts
- Summarisation and simplification of text
- Improvement to grammar a wording
- Suggestions for lots of things..

Caution

- You can use ChatGPT today

- Be careful using it when you are studying modules, for instance don't cut and paste the output for assessments

Tasks

- I suggest one person shares the screen so you can discuss the input/output

- Group 1- Text – the natural language capabilities, generation of explanations, and summarisation of text

- Group 2 – Coding – the generate syntax, input syntax (Google), and ask for explanations

- Group 3 – Knowledge – ask for recipes, shopping lists, and then ask for sustainable options

- Please complete the feedback questionnaire and I will share the finding

Surveys
